

Journey Through the Wonders of Chemistry: Field Guide To The Elements

Embark on an Enriching Exploration of the Fundamental Building
Blocks of Matter

The image shows a comprehensive periodic table of elements, titled "PERIODIC TABLE Atomic Properties of the Elements" from NIST. The table is color-coded by groups and includes various physical and chemical properties for each element. It features a legend for element types (Solid, Gas, Liquid, Amorphous, Polymer) and a reference date of September 2011. The table is organized into groups and periods, with elements color-coded by their physical states and other properties. The legend indicates that elements are color-coded by their physical state: Solid (blue), Gas (green), Liquid (red), Amorphous (yellow), and Polymer (purple). The table includes elements from Hydrogen (H) to Oganesson (Og), with various properties listed for each, such as atomic number, atomic weight, and physical state. The table is a detailed reference tool for chemists and scientists.
